

Ved Enden Av Regnbuen

The TOPO is being moved here: <http://27crag.com/crags/royken>

Rock Type: Drammens-granite

Ved Enden Av Regnbuen's Directions

From rv 23. drive to RÅ, yken and past the train station. Turn left onto Heggveien and continue straight ahead until the top of the hill. Parking is about 40m after the roundabout. Continue on foot on the tractor trail on the right for about 150-200m until you get to a fork in the path. For the Storhella sector just follow the cleared path in the undergrowth on the left of the fork. To get to underland you continue on the left path for another 100m and cross over the area cleared by lumberjacks (lots of undergrowth).

Ved Enden Av Regnbuen's History

Started development in April 2011.

Areas

- **Storhella**
The main cave is called "Storhella" by the people living in the area. Apart from the main cave, there's an abundance of walls, free standing blocks and some smaller cave/roof features.
- **Underland**
