

# Erikstein

Mostly freestanding stones, and utterly awesome quality

Rock Type: Its super solid granite except for the brittle stuff

## Erikstein's Directions

From Statoil in BÅ, in Telemark. Drive towards Seljord on Rv 36 for 6,2km and turn sharp right on to Hengebruvegen that crosses the river on a wooden hanging bridge. Cross the river and continue. Turn left when you reach Fv 155. Drive westwards for 1 km and park on the right hand side of the road underneath a rock face.

## Erikstein's History

Development of the upper floors startet in 2010

## Areas

- 2 etasje. BÅ, lgeveggen  
Continuus bulging wall starting by the El Comandante stone. Area also has some smaller free standing boulders.
- 2 etasje. Sector Ura  
Beautiful lines on mostly free standing stones. The classics in this sector is (from left to right) - Mandagsklubben 7b+, crimpy and a bit reachy - Mammut 7b, super proud highball problem - Tor med hammern...
- 2 etasje. Sektor hÅ, yre
- 2 etasje. Skogen.  
De fÅ, rste steinene man kommer til pÅ, anmarsjen. FrittstÅ, ende steiner i et lite skogholt.
- 3 etasje hÅ, yre  
Features some top of the line problems, with the steepest lines on Erikstein. Classic in this area: Anabol hÅ, yreskulder, 7b 180, 7a+ Kremtopp 6a+ Joder 7a
- 3 etasje, hÅ, yre ura  
Eksponert ur med noen fÅ, , men fine problemer og et hardt prosjekt
- 3 etasje, sector midtre
- 3 etasje, sektor loungen.  
Area consists of large quantities of rocks. A good old fashion steinur.
- 3 etasje, venstre  
Ikke flust med stein, men masse linjer Å, ta av. "Lett, men hardt" 7b+ er el classico!
- KlÅ, fta  
I klÅ, fta finnes det noen problemer, men ikke mange. Det kan vÅ, re fint Å, stoppe innom disse pÅ, vei opp til 2. Etasje.
- Sveinveggen

Steep wall with a few nice boulder problems. Roadside approach and the classic Zetor makes it worth a visit.
